-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 6, 7, 9-16, and 18-25 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Rosenplenter (EP 0813817).

Rosenplenter teaches a sugar-free hard coated chewing gum wherein the coating comprises sorbitol and erythritol in the amounts claimed, and the coating is applied 1-100 times (see entire document). This is the same as is claimed.

The claims appear to differ as to the closeness to the core and homogeneity of the layer.

These limitations are seen to be no more than inherent and/or obvious to that of Rosenplenter as the same components are used.

The recitation that the product is made by a new process, if the process were indeed new and patentable, does not render an otherwise unpatentable product new and patentable. It is pointed out that the claims are product claims and not process claims. The product must stand on its own invention, independently of the process of producing same. See *In re Marosi*, 218 USPQ 195; *In re Thorpe*, 227 USPQ 964; *Ex parte Jungfer*, 18 USPQ 2nd 1976.

Applicant's arguments filed May 17, 2004 have been fully considered but they are not persuasive.

Applicant argues that the specification provides rebuttal evidence.

Without further explanation, Table 2 is not commensurate in scope with the broadest claims (e.g. claim 1).

The declaration submitted October 4, 2002 is not persuasive for the following reasons.

- 1) The showing is not commensurate in scope with the claims. Applicant broadly claims sorbitol and 1% to 50% w/w erythritol whereas the showing is specific for a 60/40 sorbitol/erythritol.
- 2) There is no objective data or data analysis to support Applicant's conclusions.
